

Anderson Oil Engine
Manufactured by
Anderson Foundry and Machine Co.
Anderson, Indiana

Our pumps are operated by Anderson Oil Engines, selected on account of our previous experience with this engine.

Ralph P. Kistler, Pres.

R. W. Coleman, Vice Pres.

Mathews Nelson, Secy.

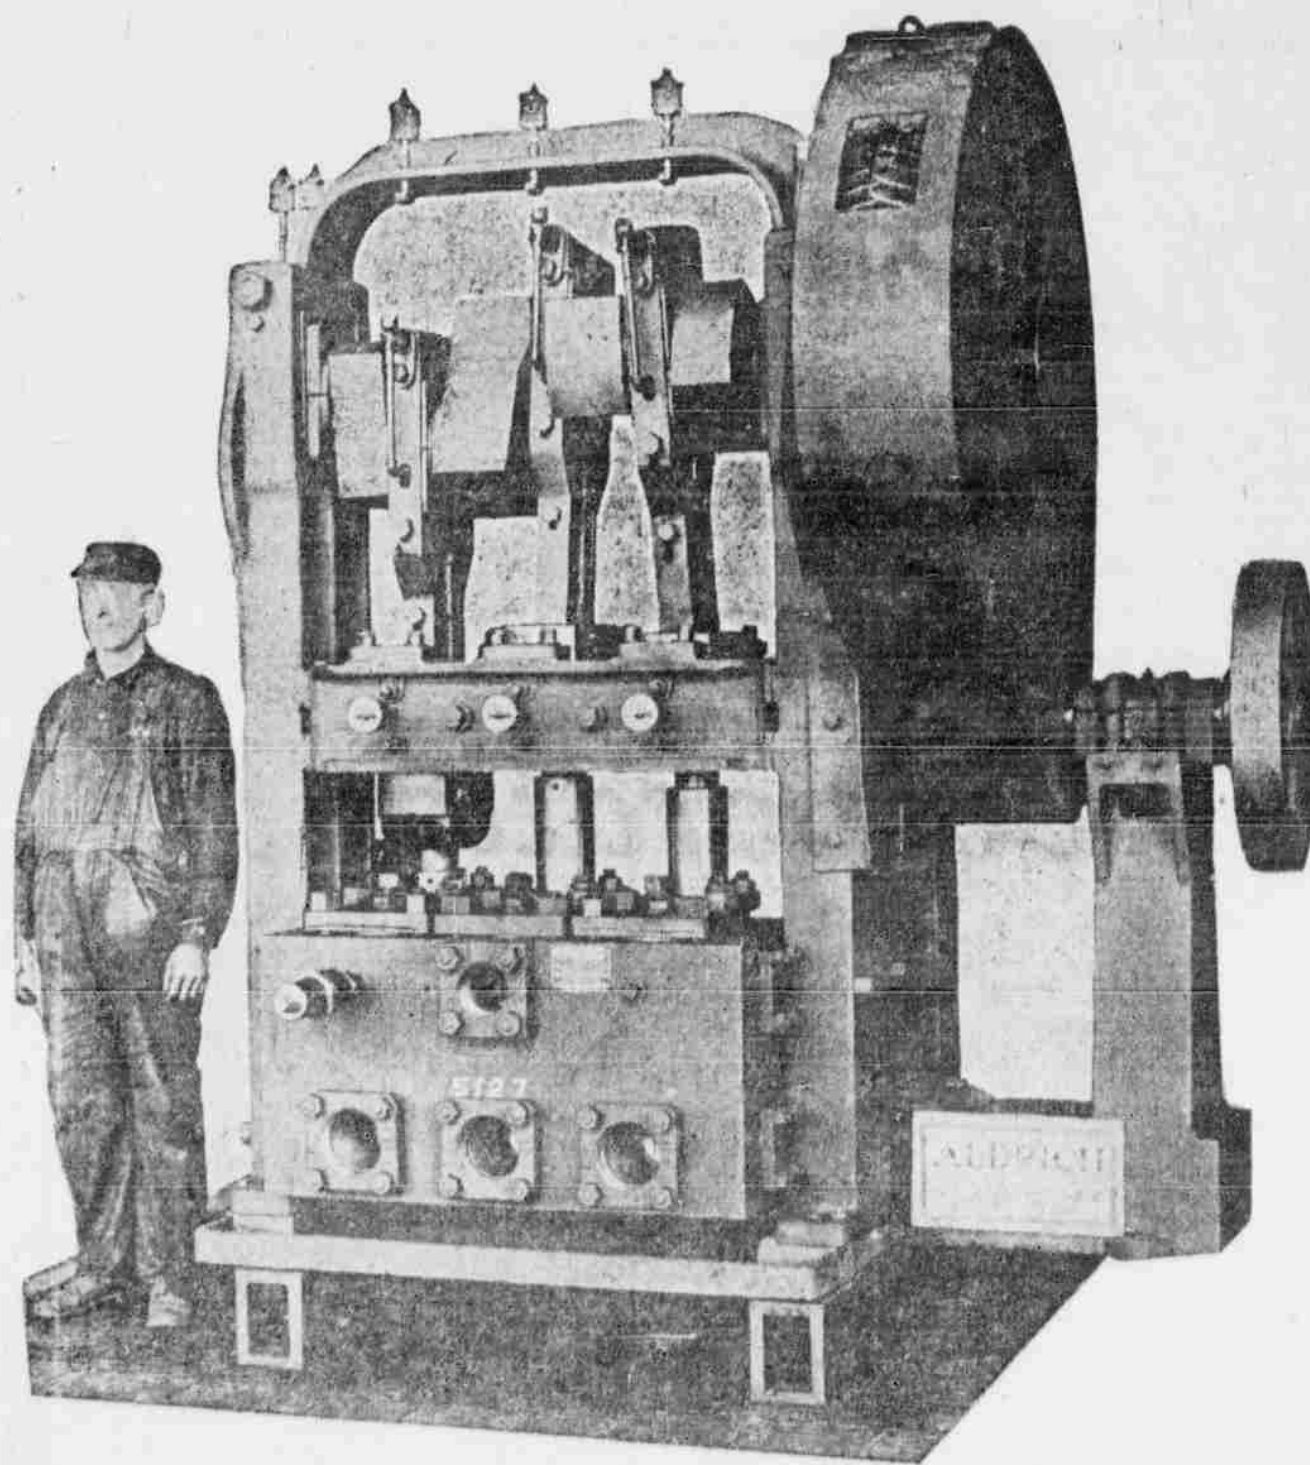

E. L. Robinson, Treas.

The Consolidated Pipe Line Company

announces itself ready for the new year and its brilliant prospects.

We solicit high gravity oil in any district of the Mid-Continent field.

The producer whose oil we run is in connection with the several refineries dependent upon us for their crude supply, and is at liberty to sell to us or direct to anyone of these refineries.

We have recently equipped our stations with the 250-barrel per hour solid fluid end pumps built specially for us by the Aldrich Pump Co., Allentown, Pa., and Tulsa, Okla.
